RE: Approval of the Additional Investigation to complete the Resource Conservation and Recovery Act Facility Investigation (RFI) at the Boeing Facility, Hazelwood, Missouri;  
Permit # MOD00818963

Dear Mr. Haake:

The Missouri Department of Natural Resources' Hazardous Waste Program (HWP) has completed review of the revised Additional Investigation to complete the RFI dated June 27, 2003, for the Boeing Hazelwood Facility. The revised Work Plan was submitted to address concerns raised by HWP project staff in a June 26, 2003, comment letter. The revised Work Plan is intended to facilitate continued characterization of the contamination at the Boeing facility and is based on the results of investigations previously conducted. The department hereby approves the June 27, 2003, revised Work Plan with the following comments.

Specific Comments

1. Coldwater Creek

In addition to volatile organic compounds, metals, and polyaromatic hydrocarbons, total petroleum hydrocarbon should also be analyzed in the sediment sample.

2. Hush House (UST Site #3)

MWs A1 and 3A should be sampled in addition to the wells selected in the statement of work. This will aid in the depiction of contamination left in place at this site.

Boeing is hereby directed to begin implementation of the statement of work in accordance with the schedule contained therein. It is requested that Boeing notify the department's HWP at least five working days in advance of any planned field activities associated with implementation of the Work Plan to allow the department's HWP the opportunity to observe such activities.

The department's HWP would like to commend Boeing for their continuing proactive approach to corrective action and commitment to ensuring that appropriate measures are taken to protect human health and the environment. If you have any questions concerning this approval or require any additional information, please do not hesitate to contact Mr. Patrick Quinn of my staff at the Missouri Department of Natural Resources, HWP, P.O. Box 176, Jefferson City, MO 65102-0176, or by phone at (573) 751-3553.

Sincerely,

HAZARDOUS WASTE PROGRAM

for Robert K. Morrison, P.E.  
Chief, Permits Section
